Total Miles:			23.7

**National Highway System Intermodal Connectors:** NHS connectors to major intermodal facilities are considered vital links in the nation's transportation system. They are the "last mile" connection between the National Highway System and the nation's most important seaports, airports, rail yards, pipeline facilities, train stations, and ferry terminals.

**National Highway System:** The National Highway System (NHS) is a network of roadways important to the nation's economy, defense, and mobility. The NHS includes the interstate system, the strategic highway network (STRAHNET), principal arterials which provide access between arterials and important facilities, and intermodal and strategic highway network connectors.

**National Highway System**

- Interstate Highway System
- Other NHS Routes\*
- NHS Intermodal Connectors
- Cities and Villages

CDP - Unincorporated Census Designated Places

\*Includes the Strategic Highway Network (STRAHNET) and other principal arterials.
